‘Be the best that you can be!’

Accessibility Plan

Introduction

The Equality Act 2010 (EqA) prohibits discrimination, harassment and victimisation on grounds of disability. Under the EqA, schools are under a duty not to discriminate in relation to disability in the context of admissions, exclusions, provision of education, access to any benefit, facility or service, and any other detriment.

The governing body has various duties towards disabled pupils under the EqA. This includes:

- not to treat disabled pupils less favourably because of or for a reason related to their disability;
- to make reasonable adjustments for disabled pupils, so that they are not at a substantial disadvantage (including concerning admissions, provision of education and access to benefits, facilities or services);
- to plan to increase access to education for disabled pupils.

This plan sets out the proposals of the Governing Body of Hampton Primary Partnership (HPP) to increase access to education for disabled pupils in the three areas required by the planning duties in the EqA:

- increasing the extent to which disabled pupils can participate in the school curriculum;
- improving the environment of the school to increase the extent to which disabled pupils can take advantage of education and benefits, facilities or services provided or offered;
- improving the delivery to disabled pupils of information which is provided in writing for pupils who are not disabled.

It is a requirement that the school’s accessibility plan is resourced, implemented and reviewed and revised as necessary. Attached is a set of action plans showing how the school will address the priorities identified in the plan.

Date of Plan: May 22 to be reviewed annually.

Definition of Disability:

Definition of Disability: Disability is defined by the EqA: 'A person has a disability if he or she has a physical or mental impairment that has a substantial and long term adverse effect on his or her ability to carry out normal day to day activities.'

The purpose and direction of the partnership's plan: vision and values

At HPP we are committed to giving all of our children every opportunity to achieve the highest of standards. We do this by taking account of pupils' varied life experiences and needs. We offer a broad and balanced curriculum and have high expectations for all children. The achievements, attitudes and well-being of all our children matter. HPP promotes the individuality of all our children, irrespective of ethnicity, attainment, age, disability, gender or background.

HPP aims to be inclusive. We actively seek to remove the barriers to learning and participation that can hinder or exclude individual pupils, or groups of pupils. This means that equality of opportunity must be a reality for our children. Key groups currently considered are shown here:

- girls and boys;
- minority ethnic and faith groups;
- children who need support to learn English as an additional language;
- children with special educational needs;
- children who are vulnerable;
- children who are deaf

We acknowledge that there may be times when this is impossible or inappropriate, despite our wishes or best efforts.

Information from pupil data and school audit

We currently have a whole range of children of all backgrounds, needs and abilities, these include:

- Diabetes
- Speech and language needs
- Global delay
- Sensory impairment
- Moderate learning difficulties
- Dyslexia
- OCD

- Processing difficulties
- Asthma
- Eczema
- Hearing impairment
- ADHD
- ASD
- Allergies
- Hyper-mobility
- Anxiety disorder
- Selective-mutism
- Tourette's

We collect information from external Nursery colleagues and settings as well as detailed information from parents so that we are prepared for children when they arrive in school.

We liaise with parents and professionals involved with the children to ensure we provide the right care for their needs.

The main priorities in the school's plan

We take advice on support needed for children with disabilities and work with experts to ensure they have the support necessary ***to fully include them in the life of the school.***

This plan sets out the proposals of the Governing Body of HPP to increase access to education for disabled pupils in the three areas required by the planning duties in the DDA thus increasing the extent to which disabled pupils can participate in the school curriculum.

This includes:

- teaching and learning and the wider curriculum of the school such as participation in after school clubs, leisure and cultural activities or school visits
- improving the environment of the school to increase the extent to which disabled pupils can take advantage of education and associated services, including improvements to the physical environment of the school and physical aids to access education
- improving the delivery to disabled pupils of information which is provided in writing for pupils who are not disabled. Including planning to make written information that is normally provided by schools to its pupils available to disabled pupils. Examples might

include hand-outs, timetables, textbooks and information about school events. The information should take account of the pupils' disabilities and the preferred format of pupils and parents and be made available within a reasonable timeframe.

The action plan ensures that:

- The schools draw on the expertise of external agencies to provide specialist advice and support.
- The inclusion manager has an overview of the needs of disabled pupils across HPP.
- There are high expectations.
- There is appropriate deployment and training of learning support staff.
- Successful practice is shared within the partnership.
- The partnership schools work together
- Disabled pupils have access to extracurricular activities.

Contextual Information

Hampton Infant School and Nursery

The school is a 1960s single storey building on one level which has 3 year groups of 4 classes which are open plan in nature, sited around the main hall separated by a corridor. There are 2 long standing temporary classrooms which are part of the EYFS. The Nursery is accessed via a ramp with a double door, this is currently undergoing a complete rebuild and will be fully accessible. The hall corridor is accessed by an external door giving access to all three year groups. The school has a separate outside room used for music and small group teaching which is accessed via a ramp and has a double opening doorway. There is a toilet with disabled access in the main part of the school. The school hall is used as an assembly hall and dining area. The main entrance is one level from the outside and the exit button is located at a level suitable for wheelchair users. The school and the grounds are fully accessible for those with mobility issues and wheelchair users. A parking space is available if required by a disabled visitor or member of staff. We currently have no wheelchair dependent children, but have parents with mobility restrictions.

Hampton Junior School

The oldest part of the school is a traditional 1907 Edwardian two storey building; the upper school is upstairs and accessed via two staircases at either end of the building. The Year 6 building is a 2 storey modern building with lift access to the 2 upstairs classrooms. The Rose Hall is on the ground floor and serves as the dining room and assembly hall. The ground floor of the main building has disabled toilets as does the year 6 building and music room. Wheelchair access is available into the main building (lower school) and into the music room, studio and dining room which are all separate buildings. Access to the upper school assembly hall, food technology room and upper school classrooms is very difficult for wheelchair users due to their location on the first floor. Feasibility studies into putting in a

lift into the main building have been completed by LBRUT but have been unsuccessful in identifying a possible site for this. All areas of the school grounds are accessible to wheelchair users, although the area near the school pond is restricted access unless accompanied by an adult. Whilst, occasionally we have pupils in a wheelchair this is only a temporary situation and we are able to adapt classroom space. At present we have no fully wheelchairs dependent pupils but we have some parents with mobility impairments.

Increasing access for disabled pupils to the school curriculum.

Improving teaching and learning lies at the heart of the partnership's work. Through self-review and continuous professional development (CPD), we aim to enhance staff knowledge, skills and understanding to promote excellent teaching and learning for all children. We aim to meet every child's needs within mixed ability, inclusive classes.

It is a core value of HPP that all children are enabled to participate fully in the broader life of the school. Consequently, all children have always been permitted to attend age relevant after school clubs, leisure and cultural activities and educational visits. The only exception would be if a child had breached school rules when deprivation of club attendance may be used as a suitable short term sanction and to ensure the safety of others.

Improving access to the physical environment of the school

Hampton Infant School has expanded to 4 form entry and Hampton Junior School is continuing to grow and develop, an extra class of children will join in Sept 2022 and the school will then be full. The additional buildings have already been provided. Provision, in exceptional cases, will be negotiated when a pupil's specific needs are known.

We have a wide range of equipment and resources available for day to day use. We keep resource provision under constant review. The school's improvement planning process is the vehicle for considering such needs on an annual basis.

Improving the delivery of written information to disabled pupils

This will include planning to make written information that is normally provided by the school to its pupils available to disabled pupils. Examples might include hand outs, textbooks and information about school events. The information should take account of pupils' disabilities and pupils' and parents' preferred formats and be made available within a reasonable timeframe.

In planning to make written information available to disabled pupils we again need to establish the current level of need and be able to respond to changes in the range of need. The school will need to identify agencies and sources of such materials to be able to make the provision when required. The schools ICT infrastructure will enable us to access a range of materials supportive to need.
