

Thursday 16th November 2023

Dear Parents/Carers,

Year 6 Science - Curriculum Enhancement - Heart Dissection

In support of our Science topic this term - 'Animals including Humans'- we will be dissecting lambs' hearts. By doing so, we will be giving children the invaluable opportunity for 'hands on' learning as they explore (in groups) the structure of the organ. We have taken all care to ensure that the requisite health and safety procedures are adhered to and are confident that this session will be of huge value and will enhance the curriculum.

The dissection will take place on **Thursday 14th December** in the afternoon.

For those children who find the dissection too overwhelming, there will be an adapted activity taking place with Ms Logan.

As always, the Year Six team appreciate your ongoing support. Should you have any further queries, please approach the year six team who will be more than happy to discuss this further.

King regards,

Year Six Team

Ms Logan, Miss Baxevanidis, Mrs Woolf, Mrs Gale, Ms Bell
